**Directions for best results**

**top loading washers** ☞ 1 oz. – medium loads ☞ 2 oz. – large loads  
**front loading washers** ☞ 1 oz. – medium and large loads

Sort wash loads by color, fabric, and amount of soil. Wash noncolorfast items separately.

**Pretreat stubborn stains** Spot test for colorfastness before treating garment. Wet problem area with undiluted Fresh Laundry Concentrate Liquid. Rub into fabric. For maximum cleaning, wait several hours before washing. For getting rid of specific stains, see guide on side panel.

Select the proper water temperature for the fabric being washed:

- Cool** Delicate and synthetic fabric and noncolorfast items
- Warm** Lightly soiled clothes, cottons, linens, and permanent press
- Hot** Heavily soiled colorfast articles, white cottons, and linens

Add Fresh Laundry Concentrate Powder to water. Because Fresh Laundry Concentrate Powder is a powerful, concentrated formula, it should be dissolved prior to contact with fabrics.

Add clothes to washer. Never overload. Mix large and small items for a balanced load. Select proper water level. Check garment labels for directions on proper care; flame-retardant fabrics may require special washing procedures.

**Use Fresh Laundry with these Get Clean products**

- Nature Bright® Laundry Booster and Stain Remover
