CLINICALLY PROVEN EFFECTIVENESS
Clinically tested to prove that with use after regular exercise, it helps speed the recovery process.

MAXIMIZE RECOVERY
PHYSIQUE is formulated to maximize recovery for both strength and endurance athletes for the anabolic or rebuilding response following regular exercise. An enhanced anabolic state can result in increased muscle mass and power for strength athletes and faster glycogen resynthesis (energy return) for endurance athletes.

FORMULATED FOR THE ANABOLIC ADVANTAGE

- With Bio-Build®, a unique ratio of protein and carbohydrate sources designed to optimize the anabolic state, to increase muscle buildup and to enhance energy return.
- With the full spectrum of essential amino acids important to the repair and building of lean muscle tissue.
- With chromium nicotinate, a highly bioavailable source of the chromium necessary for the functioning of the anabolic hormone, insulin. Insulin is required to build lean muscle tissue from protein. It also enhances energy return by pushing blood glucose into tissue cells.
