NEW Memory Optimizer™ is the next step to improving memory and learning!

Why did Shaklee develop Memory Optimizer?

Within a properly functioning brain, billions of neurons (or brain cells) transport and store our memories. However, as we age, neural connections weaken and memory formation slows down. More and more people are looking for ways to keep their memory sharp, and the smart ones are doing something about it.

What are the main differences between Memory Optimizer and Mental Acuity Plus™?

Memory Optimizer is the “next generation” of memory-enhancing dietary supplements. Based on the latest science, Memory Optimizer is formulated to improve your memory.* Mental Acuity Plus is primarily for maintaining mental acuity and support for normal circulation (for a more detailed description, please refer to the table below).*

Can I take Memory Optimizer and Mental Acuity Plus at the same time?

Both products include ingredients that can have a potential blood-thinning effect. Therefore, if you have any concerns about this issue, consult a healthcare professional before taking Mental Acuity Plus and Memory Optimizer at the same time. Additionally, if you are pregnant or nursing, or taking blood-thinning medications, consult a health care professional before taking Memory Optimizer or any ginkgo product.
