10 Reasons to Love Basic-H

Nontoxic, high performance, economical, and great for the planet.

1. Stop living in a toxic home

Some of the most questionable chemicals used regularly in household products are ammonia, chlorine, phenols, dichlorobenzene, and formaldehyde and can be found under your kitchen sink. Basic-H is nontoxic and safe for your family.

2. Eliminate your ammonia-based window cleaner

Basic-H cleans windows without streaking while being a great alternative to leading brands.

3. Everything and the kitchen sink

Basic-H cleans it all from kitchens and bathrooms to appliances, woodwork, mirrors, painted walls, and floors — it even does windows, so toss those single-purpose cleaners like sink and tile cleaners.

4. Removes the impossible

From lipstick on a linen napkin to crayons on a painted wall, full-strength Basic-H comes to the rescue.

5. On the cutting edge

A few drops on your knife sharpener keep knives extra sharp. Be sure to rinse knives thoroughly after sharpening.

6. Does odd jobs

Two tablespoons of Basic-H in a bucket of hot water lifts off old wallpaper. One tablespoon in a half gallon cleans sticky paintbrushes. Just soak for 24 hours and rinse in hot tap water.

7. Saves money

Diluted with water as directed, one 32-oz. bottle of Basic-H equals nine 22-oz. bottles of Simple Green®, 4,608 32-oz. bottles of Windex®, or 188 32-oz. bottles of Fantastik®.**

8. Camping and travel companion

A sample-size bottle of Basic-H is all you need to keep clothes, dishes, and everything else clean. And you'll help by keeping the great outdoors unpolluted.

9. Easy on the Planet

Biodegradable and environmentally friendly, Basic-H handles even hard-to-clean jobs without phosphates, borates, nitrates, corrosive chemicals, or toxic fumes.

10. Less in the landfill

Basic-H is concentrated, so you'll use fewer bottles of cleaning products throughout the year.
