ProSanté

Frequently Asked Questions

This response is for your information only. It is not to be used in conjunction with the sale of Shaklee products. Information used to sell product is labeling within FDA regulations and must be approved by our legal department. This information is not to be shared or posted on any community bulletin boards without the prior approval of Shaklee.

Ingredients

Where can I find a list of the ingredients in the ProSanté products?

Ingredients for each of the ProSanté products are listed on the back panel of each product label, except for the Nourishing Scalp Treatment, whose ingredients are listed on the side panel of the carton. A list of the ingredients can also be found in the Personal Care Ingredient Glossary available at Shaklee.net.

Are there botanicals in any of the ProSanté products?

All of the ingredients are listed on the product labels, except for the Nourishing Scalp Treatment whose ingredients are listed on the carton. These ingredients can also be found in the Personal Care Ingredient Glossary at shaklee.net. Please reference these to determine if you may be allergic to any of the ProSanté products. Since the Nourishing Scalp Treatment is the only leave-on product, and if you are concerned about allergies, you should test the product on your inner arm first before applying to your hair and scalp.

Are all of the ingredients in the ProSanté products natural?

No, but all of the products contain natural or naturally derived ingredients, especially the botanical ingredients. Shaklee has used the best possible ingredients in the ProSanté products. Furthermore, each ingredient used in the ProSanté products has been tested to ensure that they meet strict Shaklee quality standards.

Do ProSanté products contain alcohol?

Three types of safe, readily tolerated alcohols are utilized in Shaklee personal care products. Benzyl alcohol is used in both conditioners and the scalp treatment. Ethyl alcohol or SD (specially denatured) alcohol is used only in ProSanté Finishing Spray. Cetyl, and Stearyl alcohols are non-drying, fatty alcohols that provide body to the products (conditioners in the ProSanté system) and conditioning benefits to the hair, such as detangling and improved combability.

Is there fragrance in ProSanté products?

ProSanté products contain a low level of a hypoallergenic fragrance. There are four ProSanté products that contain added fragrance: Revitalizing Shampoo, Purifying Shampoo, Lightweight Conditioner, and Replenishing Conditioner. The Nourishing Scalp Treatment and Long-Lasting Finishing Spray have no added fragrance.

Are the fragrances used in the ProSanté products “natural”?

Natural fragrances tend to cause irritation to the skin and scalp. Therefore, ProSanté products utilize scientifically formulated, hypoallergenic fragrances that were specifically tested by Shaklee scientists to ensure minimum skin sensitivity.

Some people are allergic to or dislike fragrance in hair care products. Can they benefit from other ProSanté products?

The ProSanté line includes four products containing low levels of hypoallergenic fragrance. They are Revitalizing Shampoo, Purifying Shampoo, Lightweight Conditioner, and Replenishing Conditioner. For the few people who are sensitive to fragrances, even hypoallergenic fragrances, they can still use and benefit from the Nourishing Scalp Treatment and the Long-Lasting Finishing Spray, which have no added fragrance.

Propylene glycol, sodium laureth sulfate, sodium lauryl sulfate, DEA, quaternium15, urea, and formaldehyde. There’s been a lot of negative news about these ingredients. Are they in ProSanté products?

No. The other ingredients have a long history of safety and are recognized by the FDA as safe as they are used in personal care products. Many of the negative stories concerning these ingredients lack scientific support. Because these ingredients are an issue with consumers, Shaklee scientists have gone to great lengths to eliminate these ingredients from the ProSanté products. And for the record, formaldehyde is not now and has never been an ingredient in a Shaklee product.

Some of the product ingredients list the words “parabens” and “quaternium.” Aren’t they formaldehyde substances?

Parabens are not formaldehyde donors and have been used safely and effectively for decades. The only quaternium used in ProSanté is polyquaternium 82, which provides conditioning benefits to the hair such as flyaway and static control, improved combability, detangling etc. The quaternium that is a formaldehyde donor is quaternium-15, which is used as preservative, although it is not used in Shaklee Personal Care products.

Do any of the ProSanté products contain ingredients derived from wheat or gluten?

Yes. Two of the ProSanté products contain ingredients derived from wheat.

The Lightweight Conditioner contains stearyldimonium hydroxypropyl hydrolyzed wheat protein and wheat amino acids. The Replenishing Conditioner contains wheat germamidopropyldimonium hydroxypropyl hydrolyzed wheat protein and wheat amino acids.

Product Use

How important is it to use the ProSanté products as a system?

Although each product provides its own unique benefits, the clinical tests were conducted using the entire ProSanté system.

The results were:

- Reduction in hair loss during combing by 65% in 90 days
- Decrease in then number of broken hairs by 61% in 60 days
- Percentage of subjects that noted an increase in the thickness of their hair 61% in 90 days.

How can I be instructed on the use and application of ProSanté products?

The directions for use are located on the back panel of the label for each product.

The application steps for use of these products are outlined in the ProSanté System Usage Chart, which is located in the ProSanté System Talk Sheet and Product Brief, located at Shaklee.net.

How should the ProSanté products be used?

The ProSanté system of products can be customized for your individual hair care needs. The ProSanté System suggested usage guide can be found in the ProSanté System Talk Sheet and Product Brief, located at Shaklee.net.

ProSanté Suggested Usage Guide						
HAIR TYPE	normal	dry	oily	thin/fine	thick	color treated/ permed
Nourishing Scalp Treatment	every day	every day	every day	every day	every day	every day
Revitalizing Shampoo	5-6/week	5-6/week	4-5/week	5-6/week	5-6/week	5-6/week
Purifying Shampoo	1-2/week	1-2/week	1-2/week	1-2/week	1-2/week	1-2/week
Lightweight Conditioner	5-6/week	1-2/week	5-6/week	5-6/week	1-2/week	3-4/week
Replenishing Conditioner	1-2/week	5-6/week	1/week	1/week	5-6/week	3-4/week
Long-lasting Finishing Spray	as needed	as needed	as needed	as needed	as needed	as needed

I have damaged hair and experience related thinning. Should I use ProSanté?

Yes. The ProSanté hair care system has been specially formulated to help reduce thinning related to hair damage. These products have been clinically tested to show dramatic improvements in the reduction of hair loss during combing, and a decrease in the number of broken hairs.

How long after I begin using the ProSanté products will I begin to notice a change in the way my hair looks and feels?

Many notice a dramatic difference immediately, but with continued use of the ProSanté System, Independent clinical tests showed the following results:

- 65% reduction of hair loss during combing in 90 days.
- 73% decrease in the number of broken hairs in 90 days.
- 61% of subjects noted an increase in the thickness of their hair in 90 days.

Can the ProSanté hair care system be used on all hair types?

Yes, the ProSanté System of products were developed and tested for all hair types. This system allows for customization for individual hair needs.

What happens if you skip one or two items on the recommended regimen? I am often in a hurry and don't have time to apply conditioner and/or Nourishing Scalp Treatment.

Because the products were specifically designed to work together as a system for optimal results, you won't enjoy the benefits and results that have been clinically proven if you don't use the complete system. There are only three steps, (shampoo, condition and apply Nourishing Scalp Treatment), and they are quickly accomplished.

Can I mix and match other hair care brands with the regimen?

Our products have been designed to work best as a complete system. Test results show that when used as a system, the ProSanté products can provide significant results. Replacing any one product from the ProSanté system with any other brand will detract from the overall integrity of the system. Shaklee products are 100% guaranteed. If, for any reason, you are not fully satisfied with a Shaklee product, return it to your Independent Shaklee Distributor or Shaklee Corporation for an exchange or full refund.

I wash my hair every other day. Can I use the Nourishing Scalp Treatment if I haven't washed/cleaned my hair?

Yes. The Nourishing Scalp Treatment is a product that is best applied to a clean scalp, but continue to apply daily, even if you haven't washed your hair.

The directions say to use 20 drops of the Nourishing Scalp Treatment. Is there any harm in using more?

No. However, the Nourishing Scalp Treatment is an extremely effective product and was clinically tested as part of the ProSanté System of products, using 20 drops. The independent clinical testing showed dramatic results with this recommended usage.

I have extremely dry, damaged hair.

Or, I have extremely oily, hair. Which ProSanté products should I use?

Refer to the ProSanté Product Usage Chart located in the ProSanté System Talk Sheet or Product Brief at Shaklee.net.

Can men use ProSanté products?

Yes. The ProSanté system of products was designed and tested on women and men, with dramatic results. For individual preferences, refer to the ProSanté System Usage Chart located in the ProSanté Flyer, or the System Talk Sheet and Product Brief located at Shaklee.net.

Can Teenagers and Children use all the ProSanté products?

Yes. These products are extremely gentle and can be used by the entire family. We would not recommend using them on infants/toddlers younger than three years of age.

Do any of the ProSanté products contain ingredients that will protect hair from the sun?

Yes. The Long-Lasting Finishing Spray contains the ingredient ethylhexyl salicylate, which protects hair from UV damage.

How does ProSanté Long-Lasting Finishing Spray compare to Shaklee Arrange® Mist Hair Spray?

The ProSanté Long-Lasting Finishing Spray is a medium-hold spray compared to Arrange Mist Hair Spray, which was for hard-to-hold styles. The medium-hold spray is great for use with today's contemporary hair styles, providing hold without stiffness or stickiness.

Can I use the Long-Lasting Finishing Spray as a styling product? (i.e., spray on wet hair and style with blow dryer, curling iron, etc.)

The Long-Lasting Finishing spray was designed to spray on hair after styling to help set your style.

The pump spray on the Long-Lasting Finishing Spray sticks. What can I do?

Remove the pump sprayer from bottle, rinse with warm water, and replace on bottle.

Troubleshooting

I've experienced a slight warming and/or tingling on my scalp since using the Nourishing Scalp Treatment? Is this normal?

Some people experience a mild warming/tingling sensation after applying the Nourishing Scalp Treatment. This feeling indicates that the pure, derma-available energizing nutrients are working and beginning to impart their unique benefits. If you are experiencing discomfort, discontinue use. Avoid contact with the eyes. If contact with eyes should occur, flush eyes with water for 15 minutes. If discomfort continues, seek medical attention.

What if I have experienced sensitivities to botanicals?

If you have experienced botanical sensitivities, test the Nourishing Scalp Treatment on your forearm before using. This is the only leave-on product and has the highest concentration of botanicals.

If I have a sunburn, is it OK to use all the products?

Yes. But if you are experiencing any discomfort, wait until the condition clears and resume use.

If these products get into eyes, what should be done?

Flush eyes with water for 15 minutes. If discomfort continues, seek medical attention. Since the Nourishig Scalp Treatment is a water-thin formulation, you might want to use a head-band while applying product to absorb any drips that may occur and keep product out of eyes.

Competitive Comparison

How different are ProSanté products from what is in the marketplace?

The ProSanté hair care system provides one simple, flexible system that can be personalized to meet each individual's unique hair needs in every situation. ProSanté products have been formulated with the exclusive Scalp Health Complex, which maximizes derma-availability of vital skin nutrients. Used as a system, the ProSanté products have been clinically proven to naturally and dramatically reduce hair loss during combing, visibly increase thickness and volume, and reduce breakage for all hair types.

What makes the ProSanté hair care system superior to the Shaklee Hair Care products that have been discontinued?

ProSanté products are completely different from any other hair care products Shaklee has ever offered. Each ProSanté product is formulated with the exclusive Scalp Health Complex , which maximizes derma-availability of vital skin nutrients. The result is a hair care system that provides nourishing ingredients to the scalp to comprehensively reduce hair damage and related thinning.

Packaging/Recycling

Is ProSanté packaging recyclable?

All of the ProSanté containers and caps are recyclable and can be placed in curbside recycling bins. The recyclable packaging is constructed of high-density polyethylene (HDPE) for bottles and polypropylene (PP) for caps. However, the extent to which these items are recycled is dependent upon the reclaimers'/handlers' criteria for acceptance of the full package composition and whether there are recycling facilities in your area.

(08/02) 02-616

Clinical Studies

What was the age group of people who tested the ProSanté system of products?

90-day clinical testing was conducted on people aged 25-55 years of age. However, like other Shaklee products, extensive testing was conducted prior to the clinical testing, and those participants ages ranged from 25-86 years of age.

How long were the products tested?

The products have been undergoing development and ongoing testing for over three years, and the system of products underwent clinical testing for 90 days.

General

What does “ProSanté” mean?

”Pro” is for positive, professional, favorably disposed toward. “Santé” is a French term meaning “for your health.”

What is the shelf life of the ProSanté products?

If stored in a cool, dry place and sealed tightly, each ProSanté product should have a shelf life of at least two years.

What nutritional products should be taken to optimize hair health in combination with the use of ProSanté products?

Shaklee Basics and Soy Protein for a strong nutritional foundation. Additional products include: Zinc, CarotoMax, and CoQHeart. If you are not taking Shaklee Basics, then we suggest Vitamin E and Vitamin C.
